

The state of the Aquatic Warbler population in Ukraine

Anatolii Poluda, Mykhailo Khymyn, Oleksandr Iliukha

Ukrainian Society for the Protection of Birds

Registrations of the Aquatic Warbler in the breeding period in Ukraine until 1995

**Discoveries of the Aquatic
Warbler
in Belarus and Ukrainian
Prypiat. Expeditions of
1995**

**Discovery of the Aquatic
Warbler in Ukraine
(floodplain Supii river).
Expedition 1995**

Prypiat population group

AW number
(males)
3470-4125
(2009)
3630-4280
(2010)

Distribution of the Aquatic Warbler in Ukraine after 1995

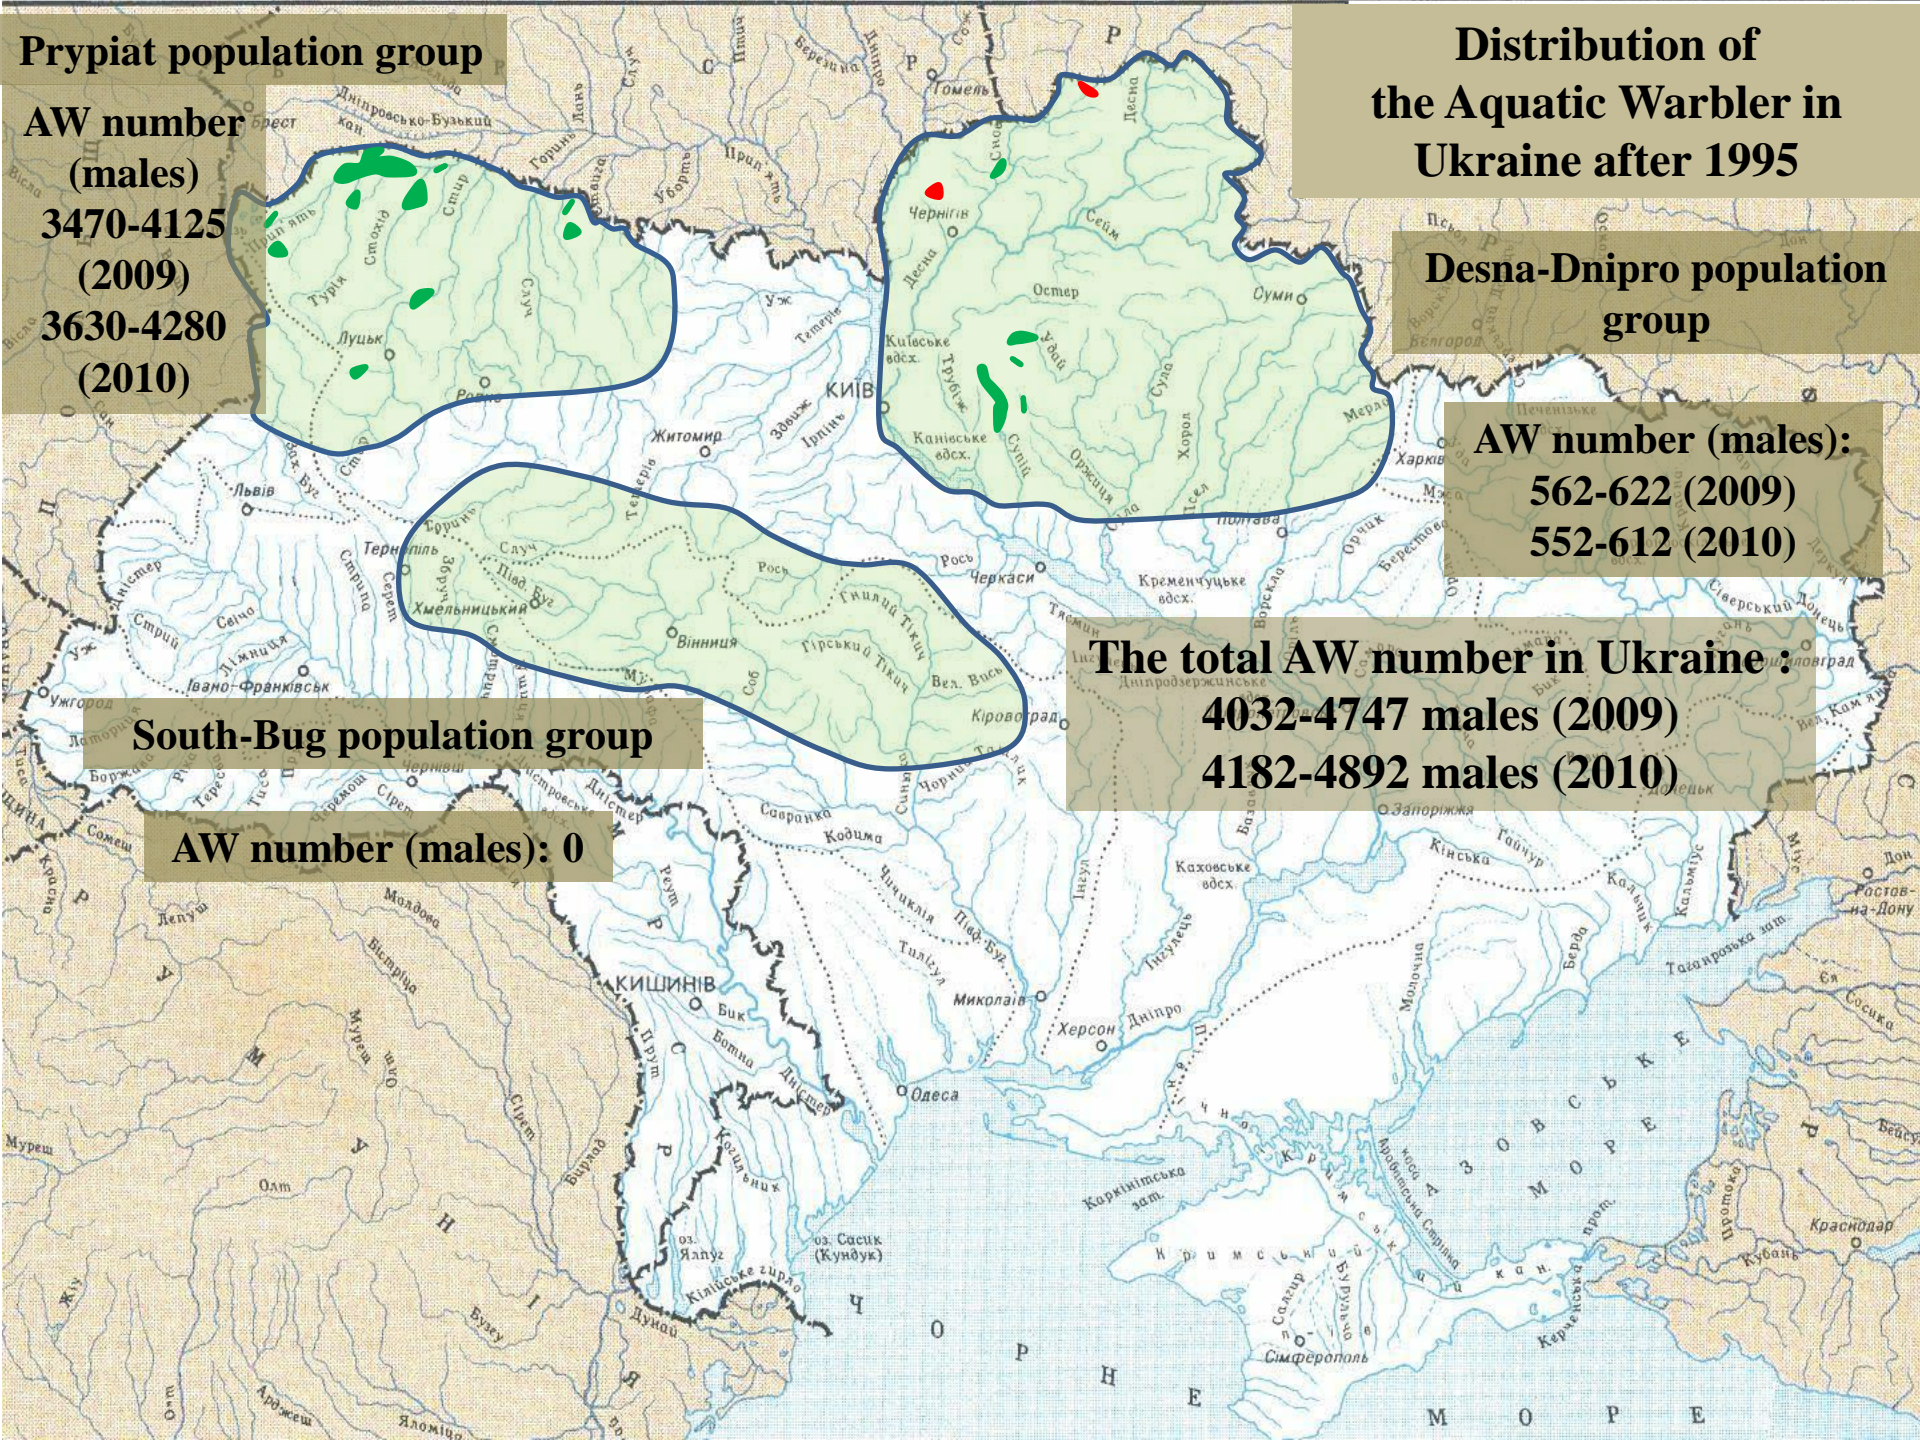

Desna-Dnipro population group

AW number (males):
562-622 (2009)
552-612 (2010)

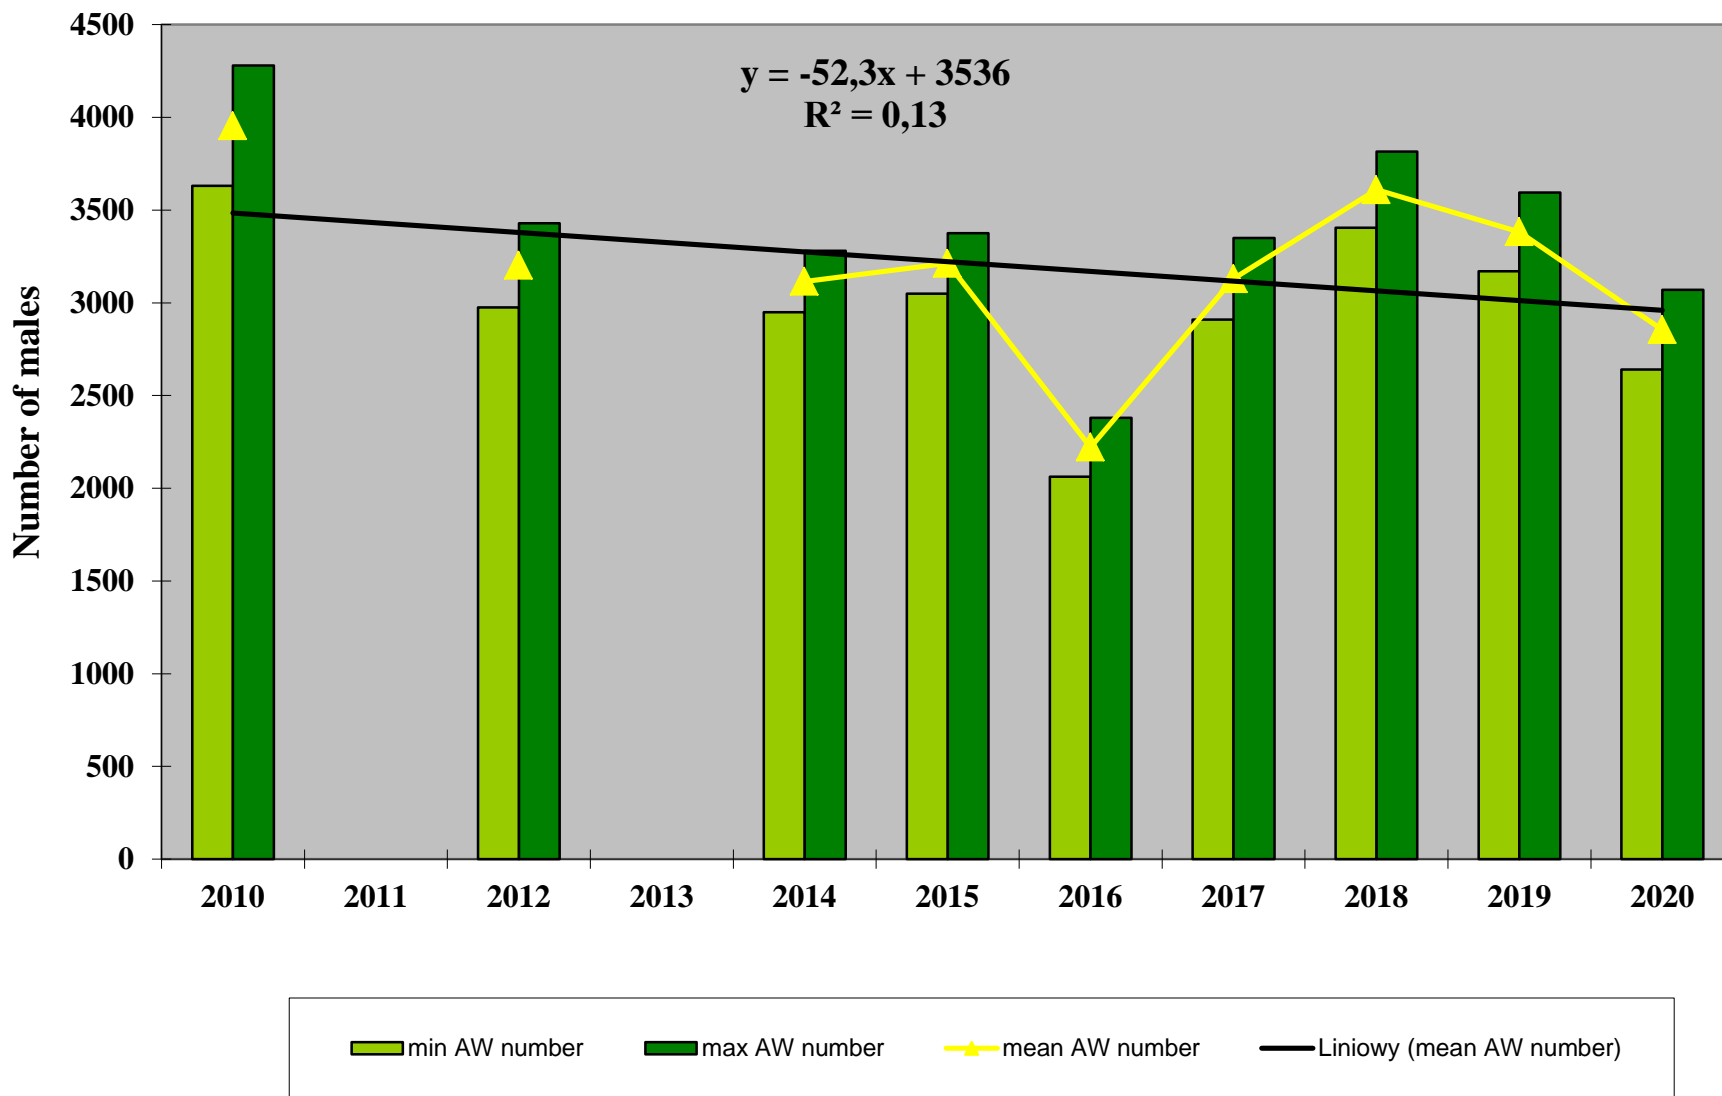

The total AW number in Ukraine:
4032-4747 males (2009)
4182-4892 males (2010)

South-Bug population group

AW number (males): 0

Dynamic of AW number of the Prypiat population group in 2010-2020

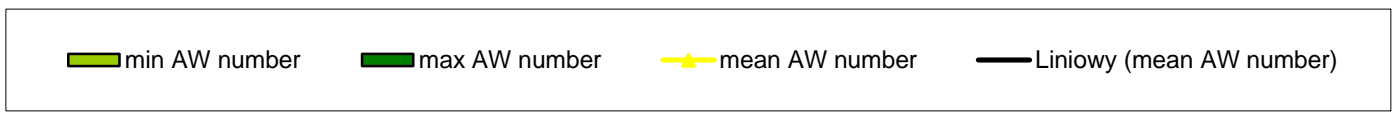

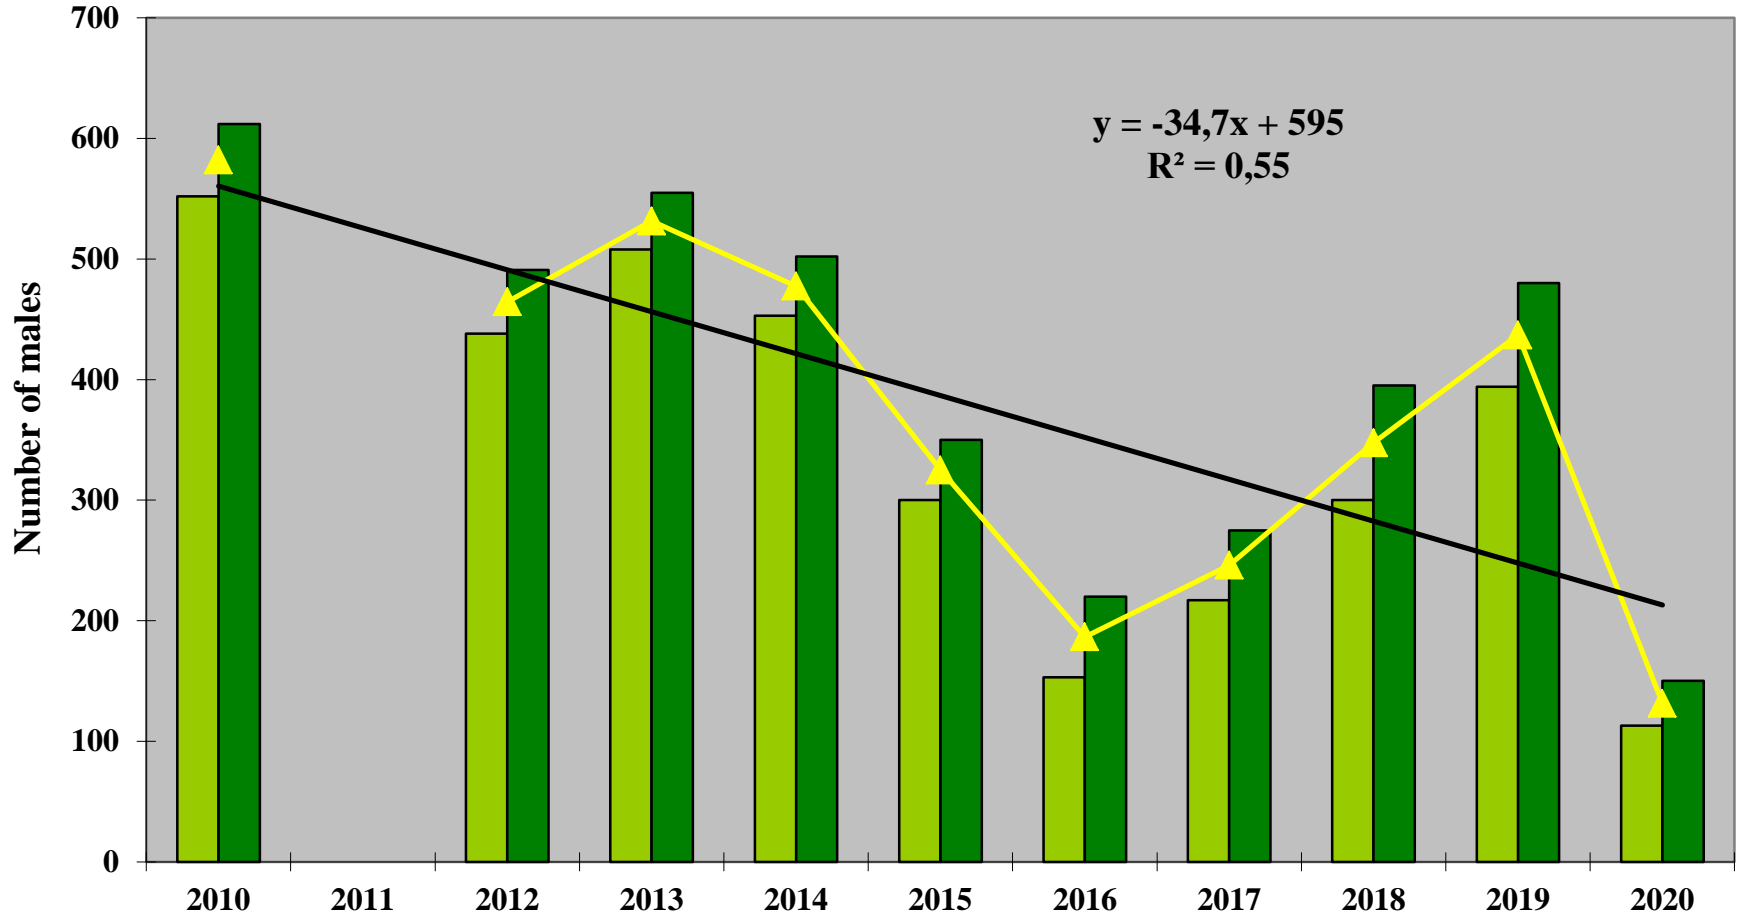

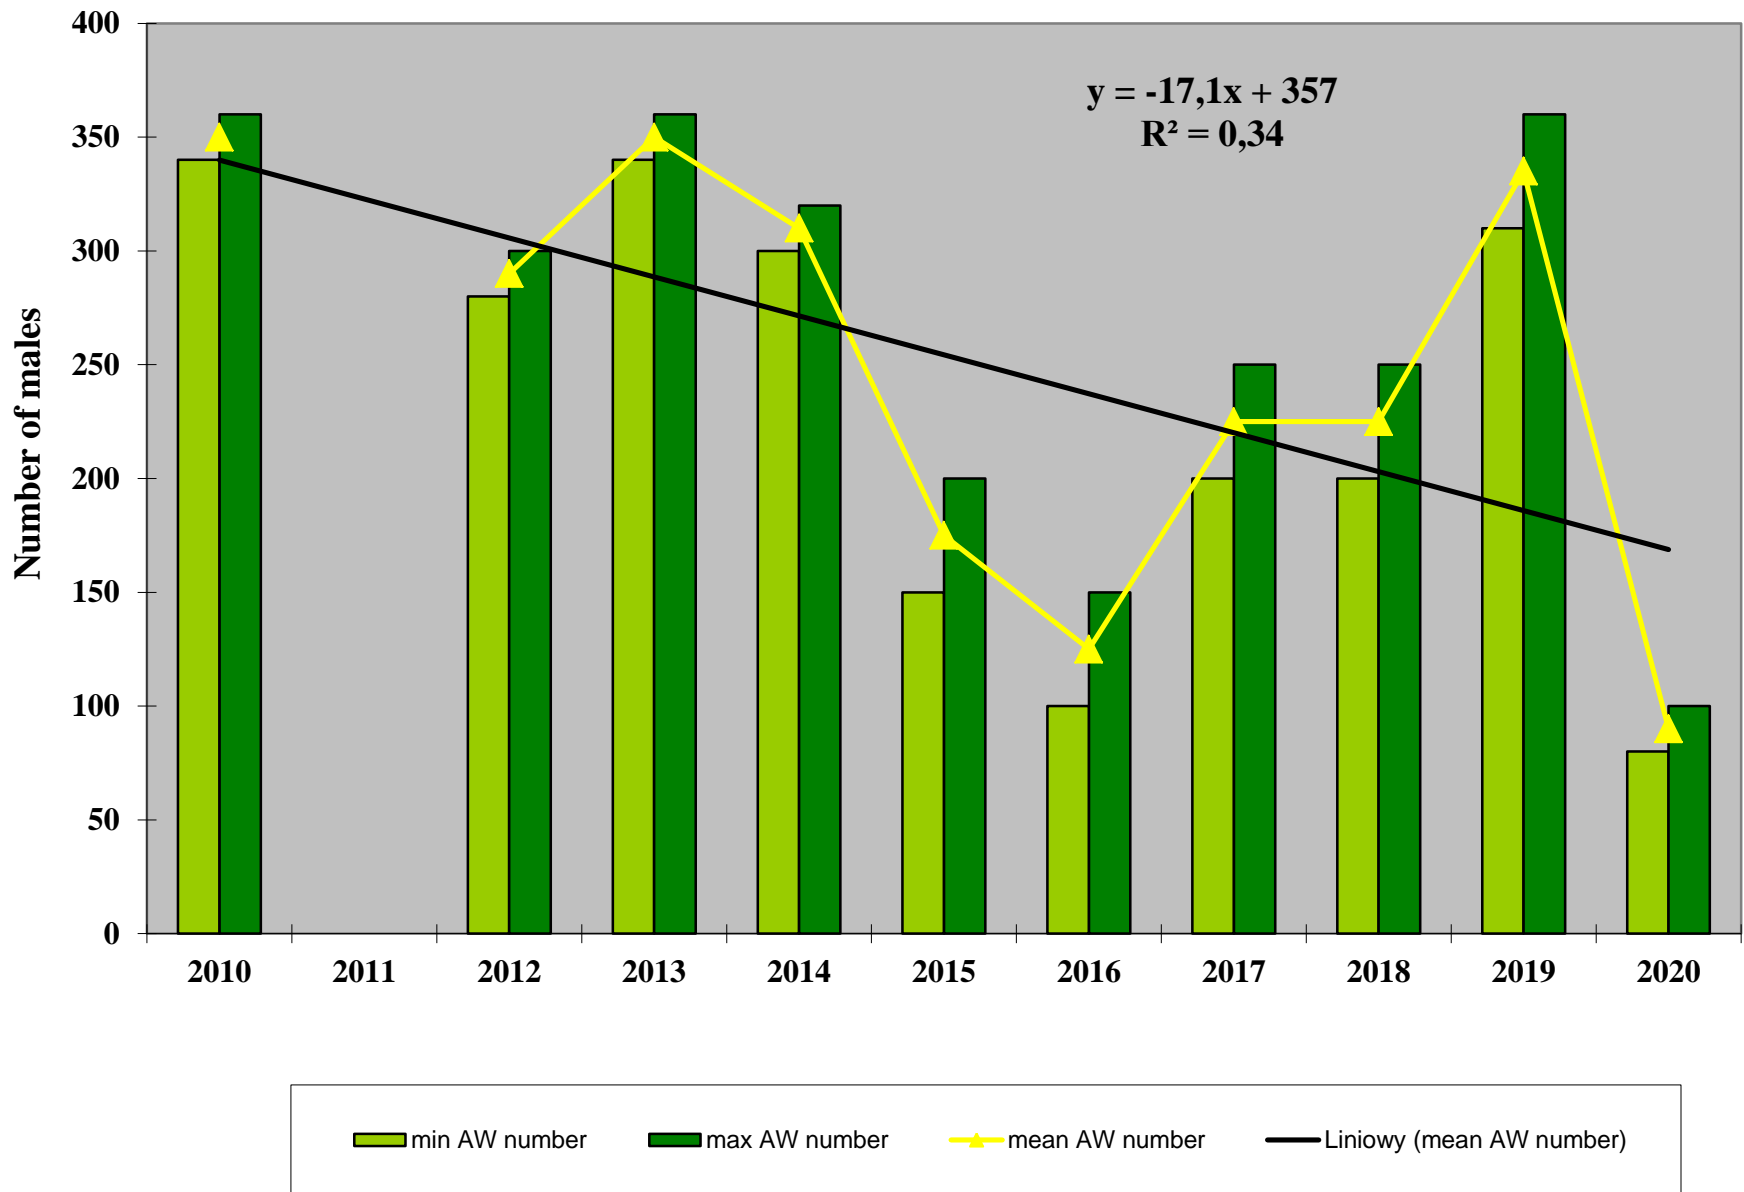

**The breeding site UA-17 “lake Liubiaz” (Upper Prypiat) after a fire
(June 2016)**

Dynamic of AW number of the Desna-Dnipro population group in 2010-2020

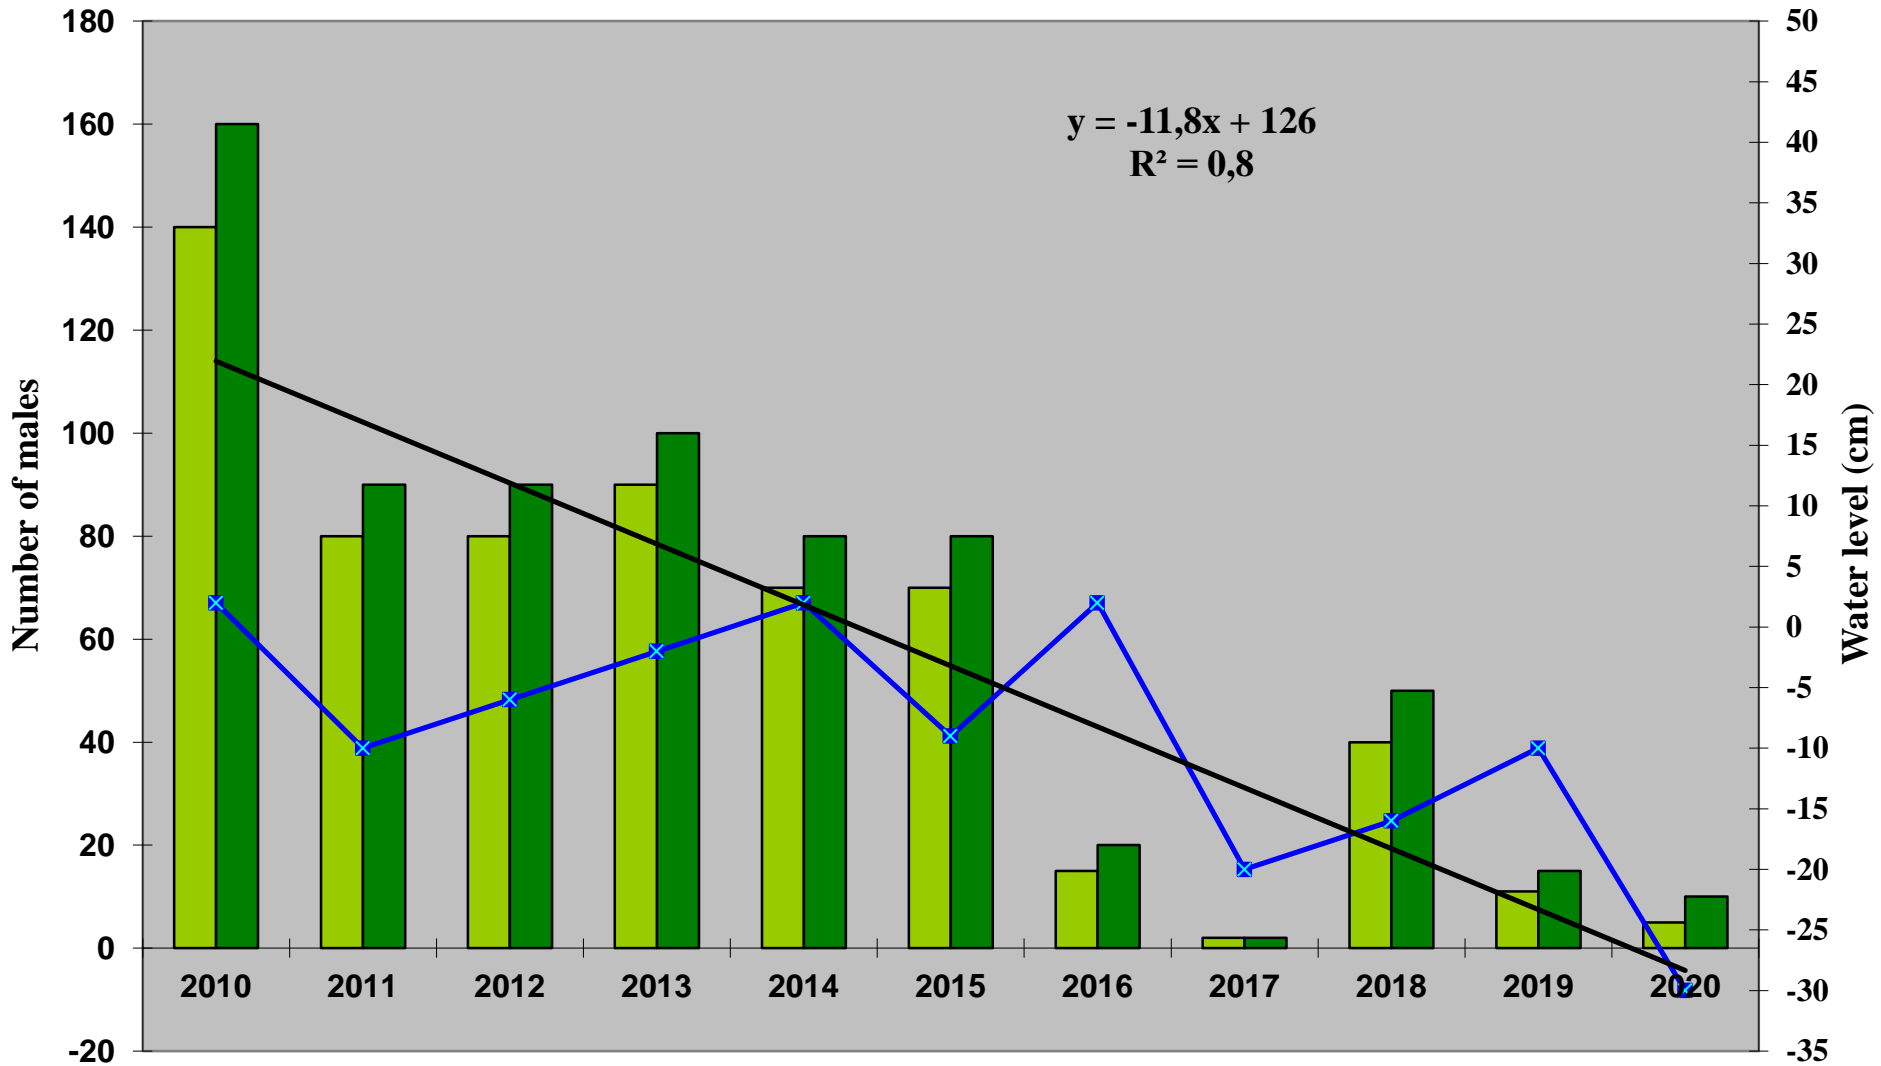

Dynamic of AW number in the key breeding site UA-05 Udai valley "Dorohinka-Monastyryshche" in 2010-2020

**Transformation
of monitoring plot
in the breeding
site UA-01 Supii
valley
"Vilne-
Berezanka"**

Dynamics of AW number and water level in the UA-01 Supii valley "Vilne-Berezanka" in 2010-2020

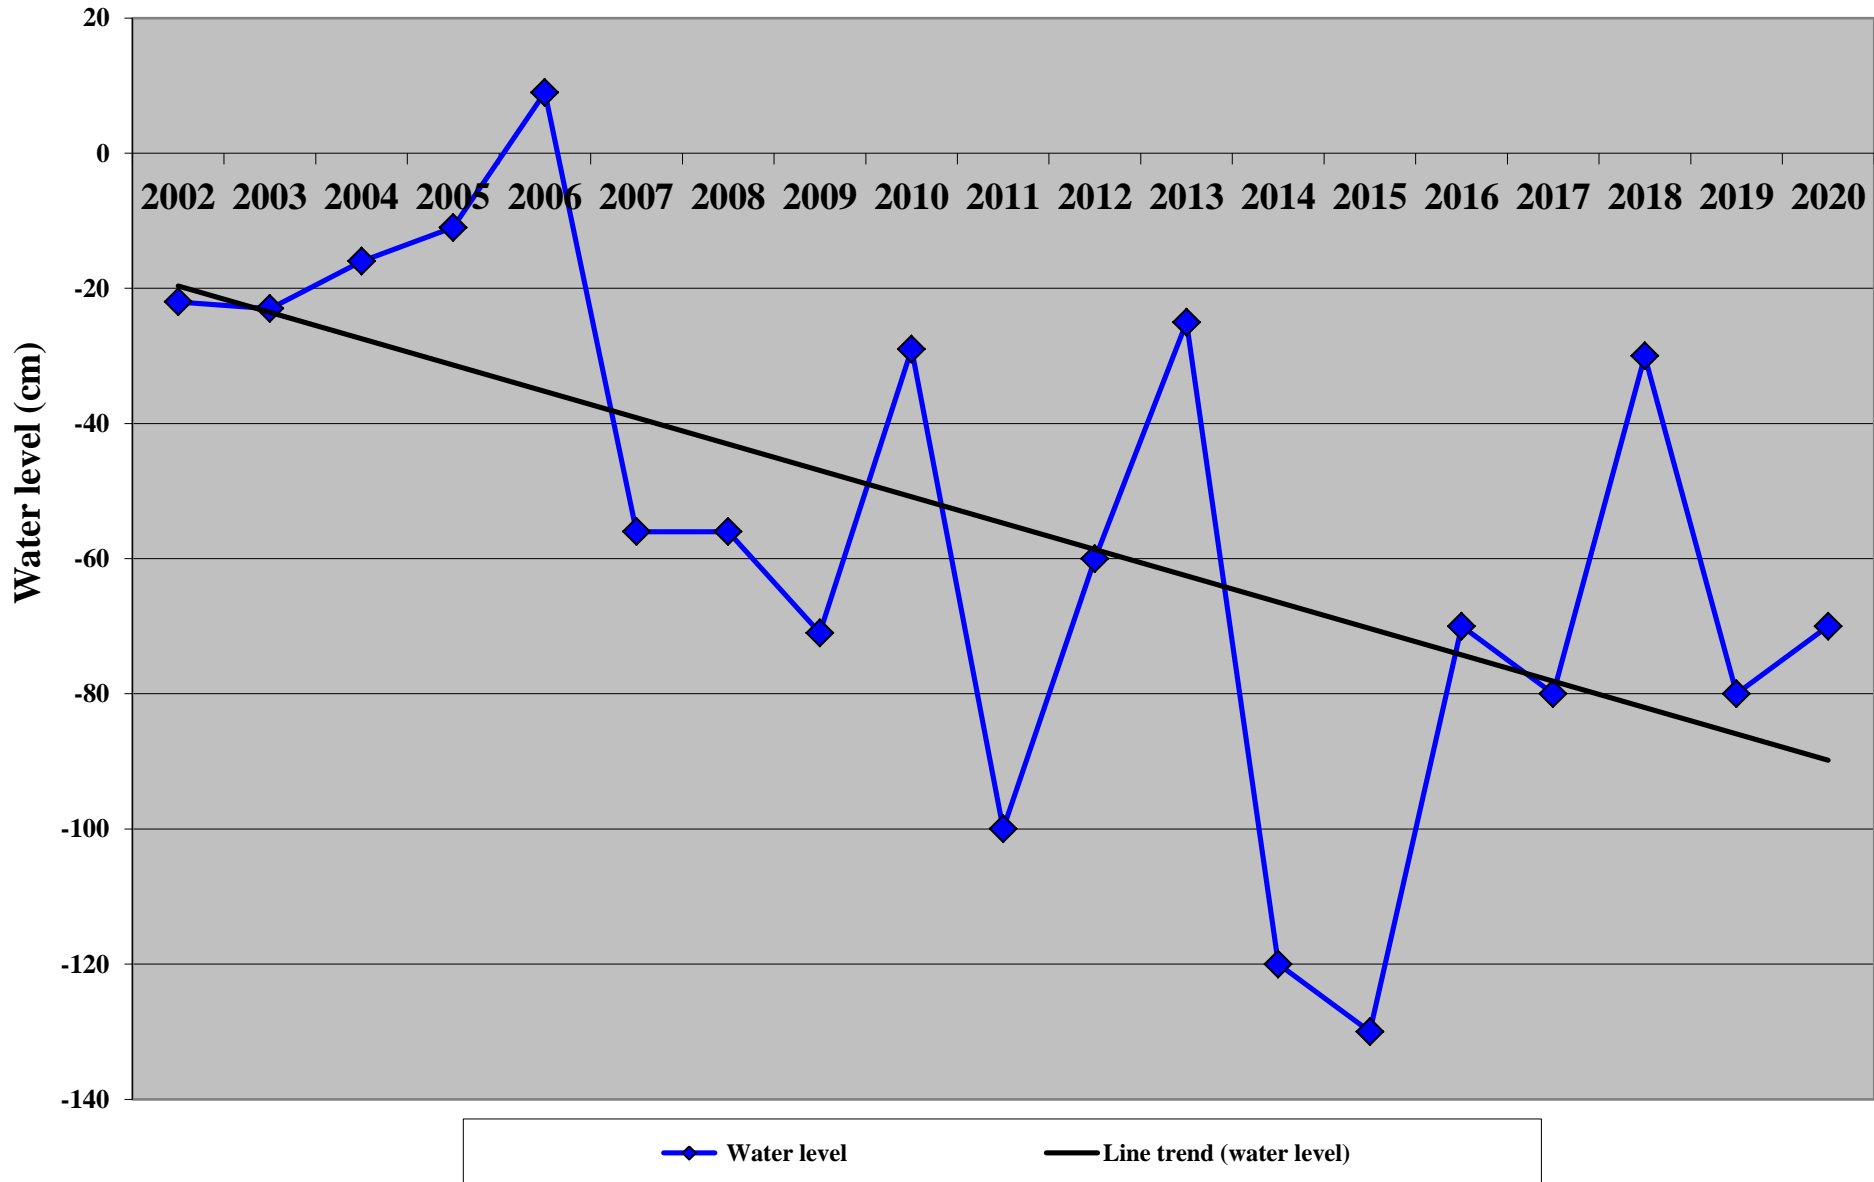

min AW number

max AW number

water level

Liniowy (min AW number)

Dynamic of water level in the Udai river in the begining of June (2002-2020)

Thank you for attention
