

AW in Ukraine - population estimates, trends, conservation status and threats

Anatoliy Poluda

Breeding site in valley of Supoy river

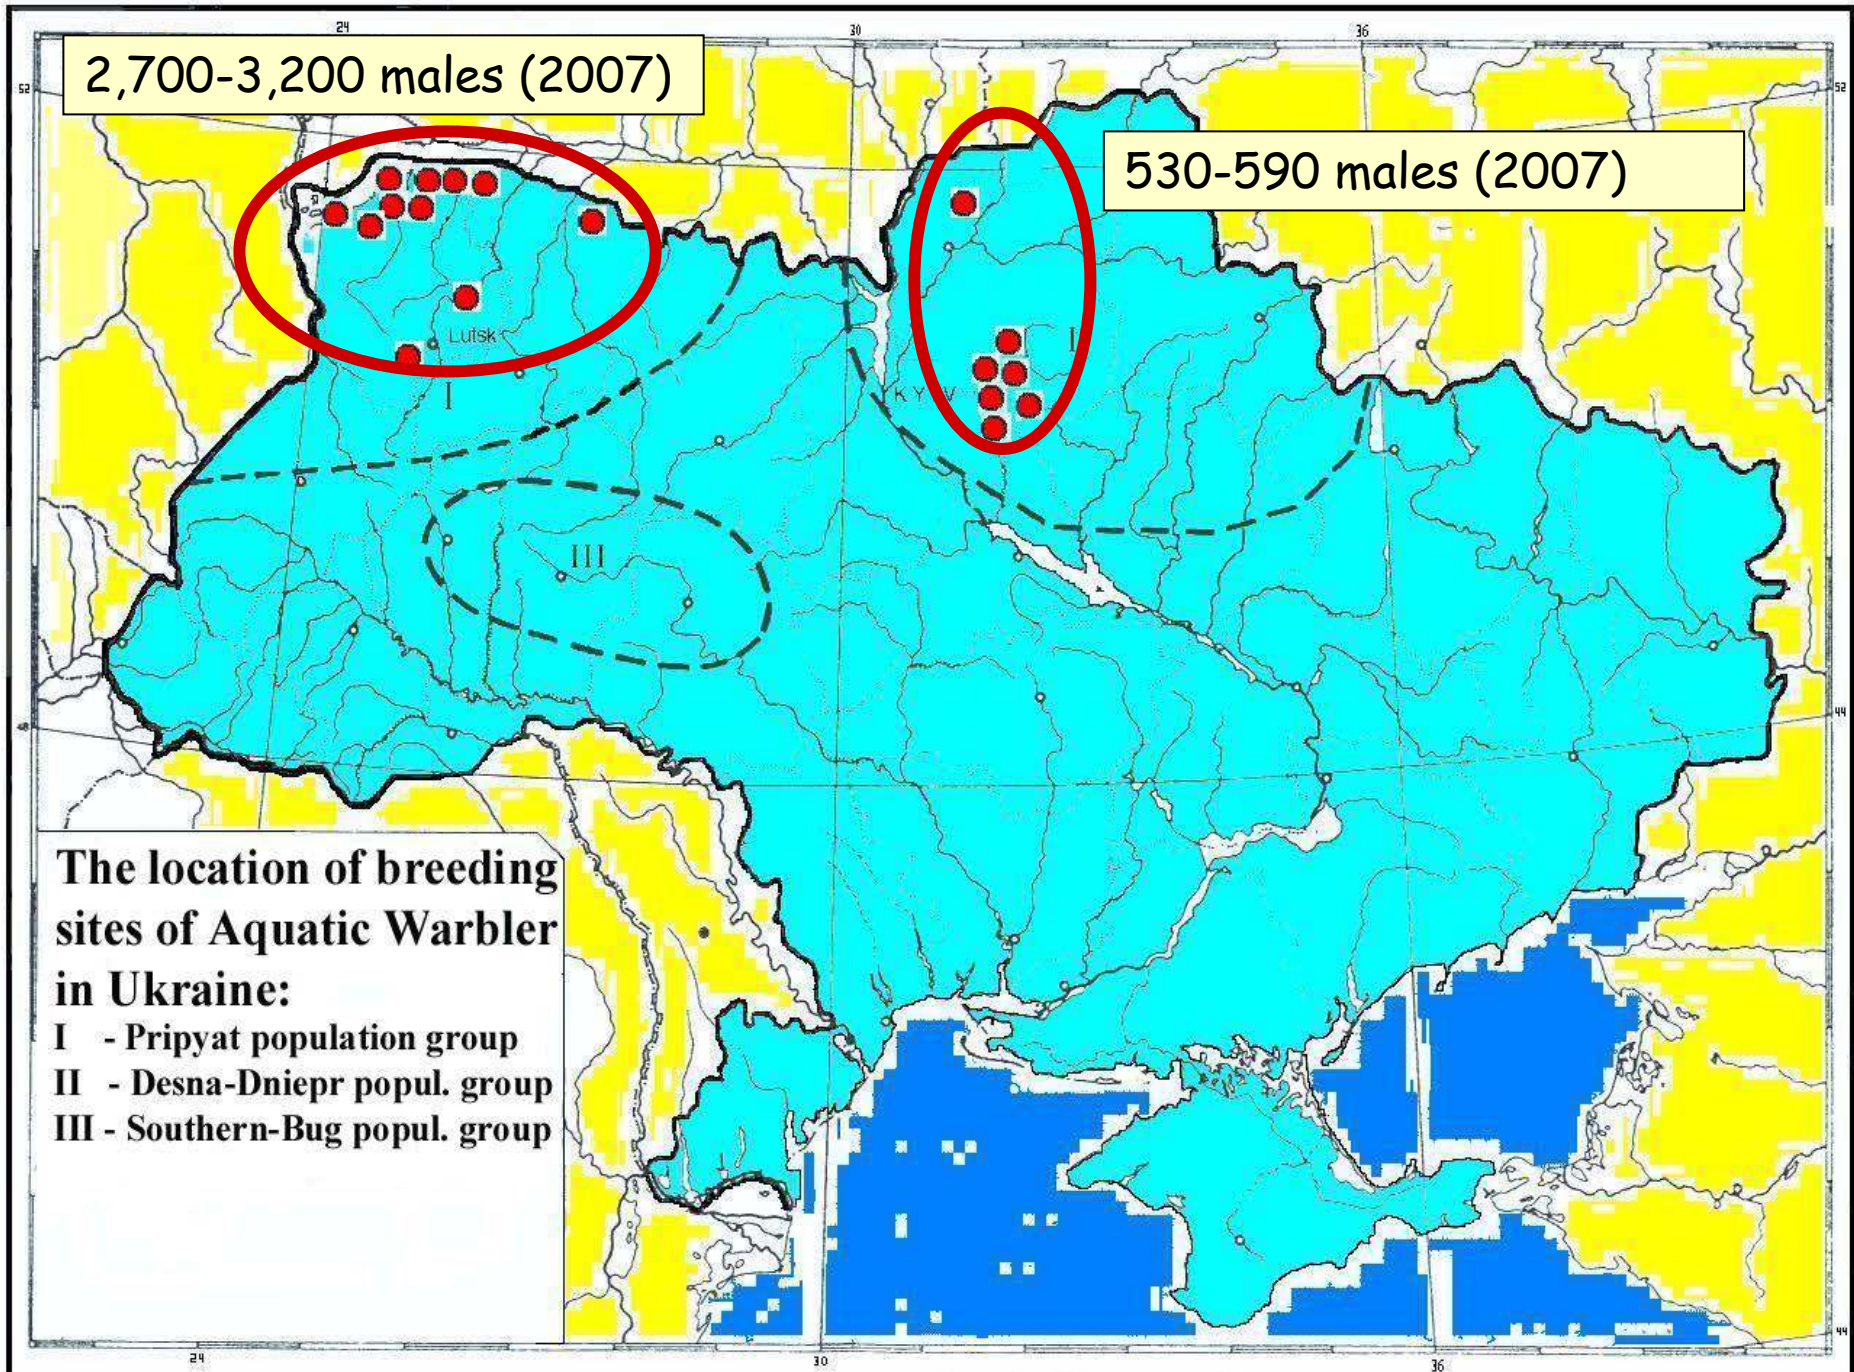

2,700-3,200 males (2007)

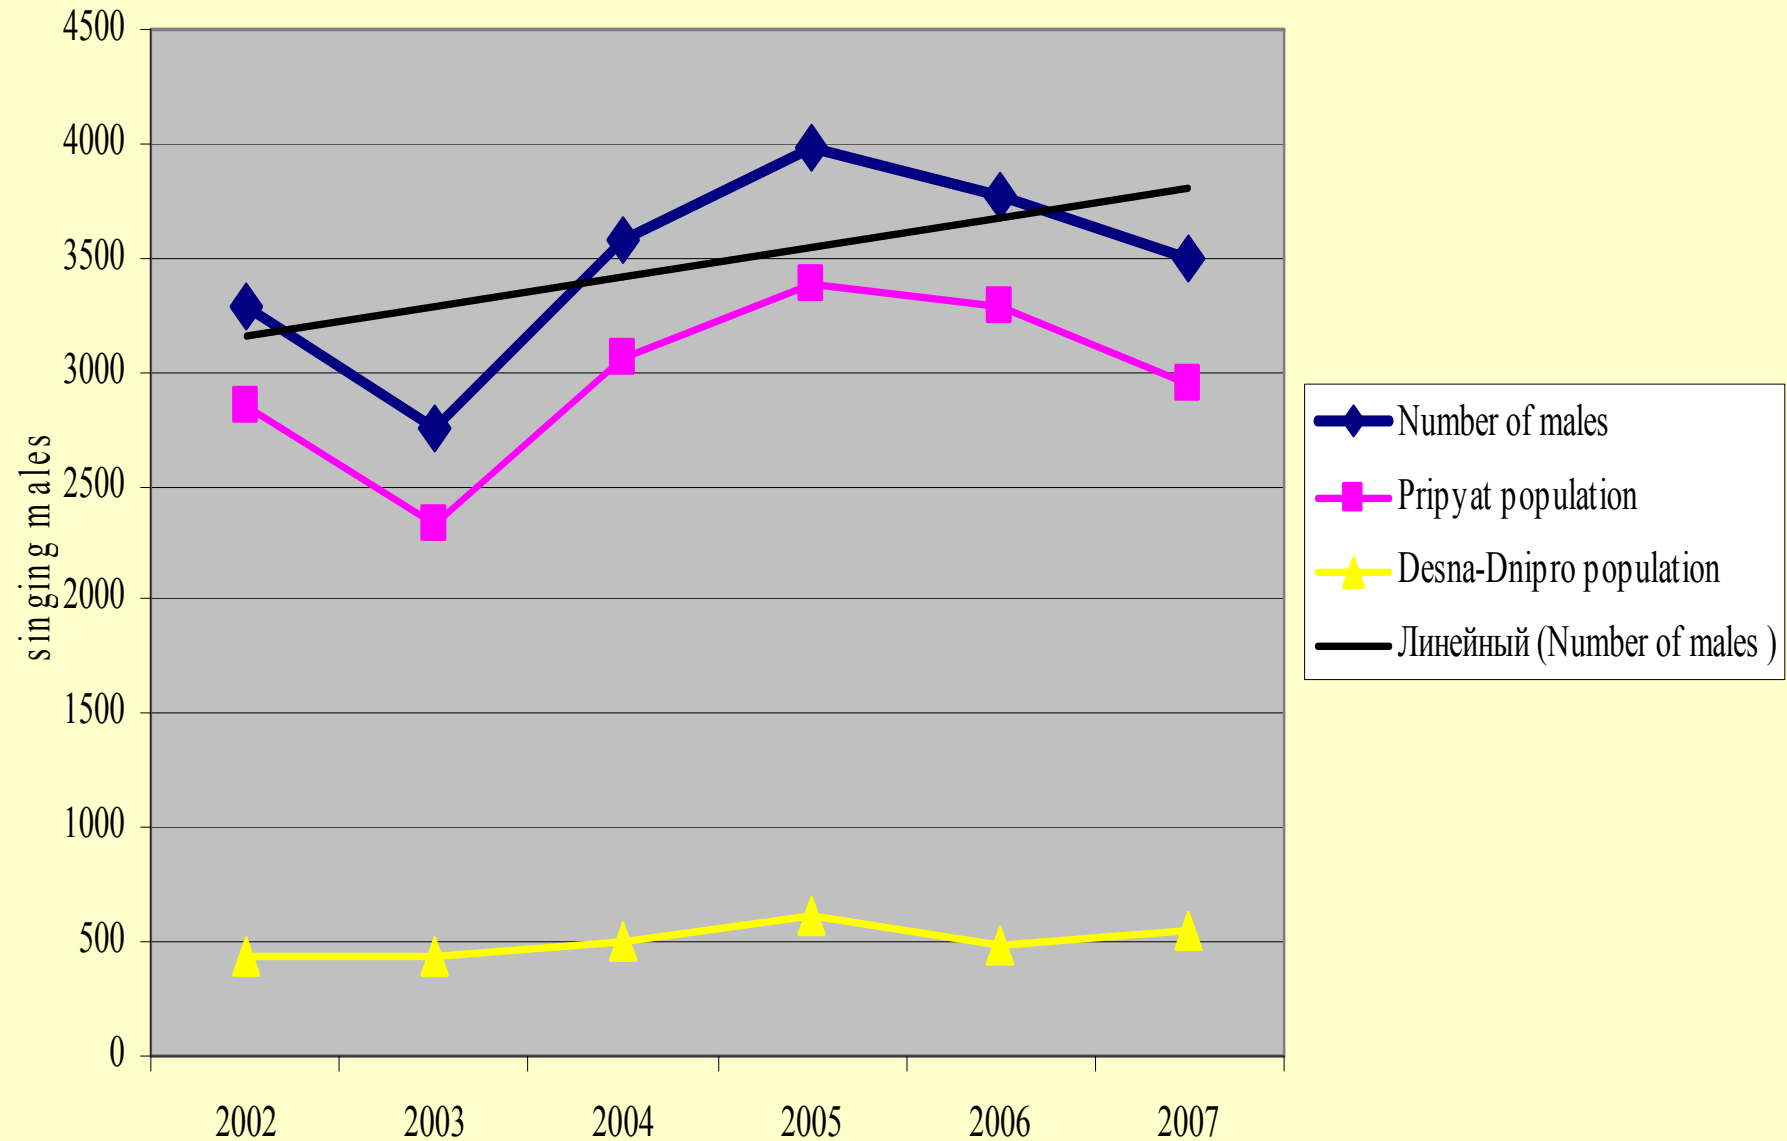

530-590 males (2007)

The location of breeding sites of Aquatic Warbler in Ukraine:

- I - Pripjat population group**
- II - Desna-Dniepr popul. group**
- III - Southern-Bug popul. group**

Aquatic Warbler: population development in Ukraine 2002-2007

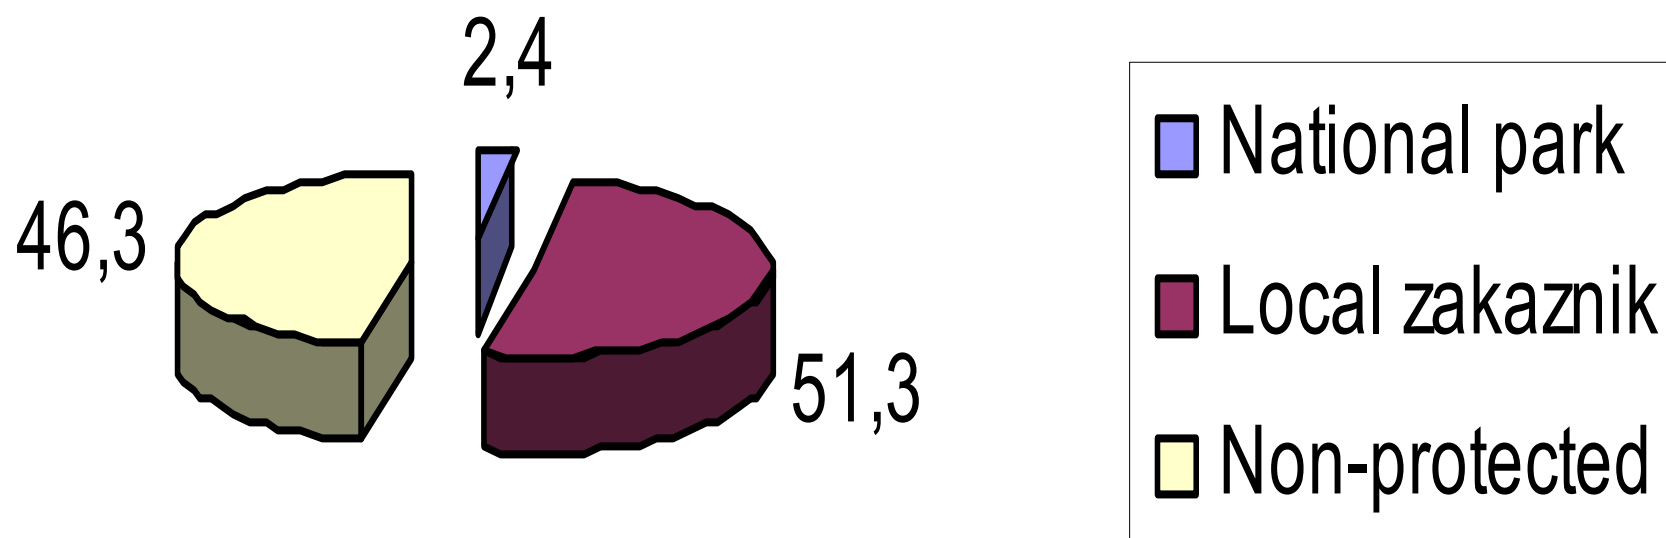

The Desna-Dnipro population group of Aquatic Warbler

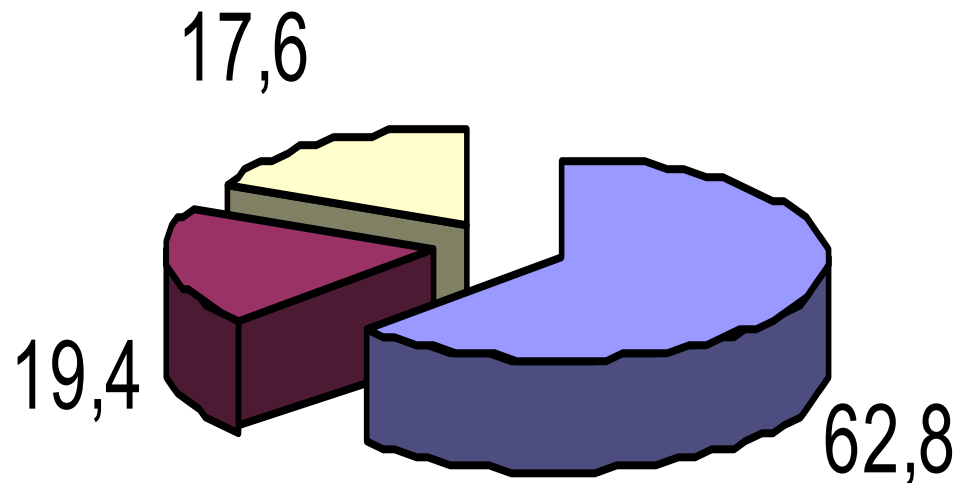

Site	Number of males in 2007	Conservation status (now)	Conservation status (in the future)
Uday valley (key site)	300-320	State zakaznik – 17% biotopes Local zakaznik – 71% Non-protected area – 12%	National park
Supoy valley (key site)	140-160	State zakaznik – 100%	
Galka valley	30-35	Non-protected area – 100%	State zakaznik
Mire near Snov river	25-30	Local zakaznik – 100%	State zakaznik
Supoy valley near Voronky	10-15	Local zakaznik – 100%	State zakaznik
Perevid valley	12-15	Non-protected area – 100%	State zakaznik
Supoy valley near Bilotserkivtsy	12	Local zakaznik – 100%	State zakaznik
Supoy valley near Noviy Bykiy	0 (2006-2007)	Local zakaznik – 100%	State zakaznik
Mire Zamglay	0 (after 1998)	State zakaznik	
Snov valley near Elino	?	Non-protected area	
Total number	529-587		

Conservation status of Pripyat population (till 2007) (% of population size)

Conservation status of Pripyat population (now) (% of population size)

- National park
- Local zakaznik
- Non-protected

Conservation status

Desna-Dnipro population:

- 92,4 % population on protected territories (now)
- 100 % (in the near future)

Pripyat population:

- 82,4 % population on protected territories
- 17,6% population on non-protected territories

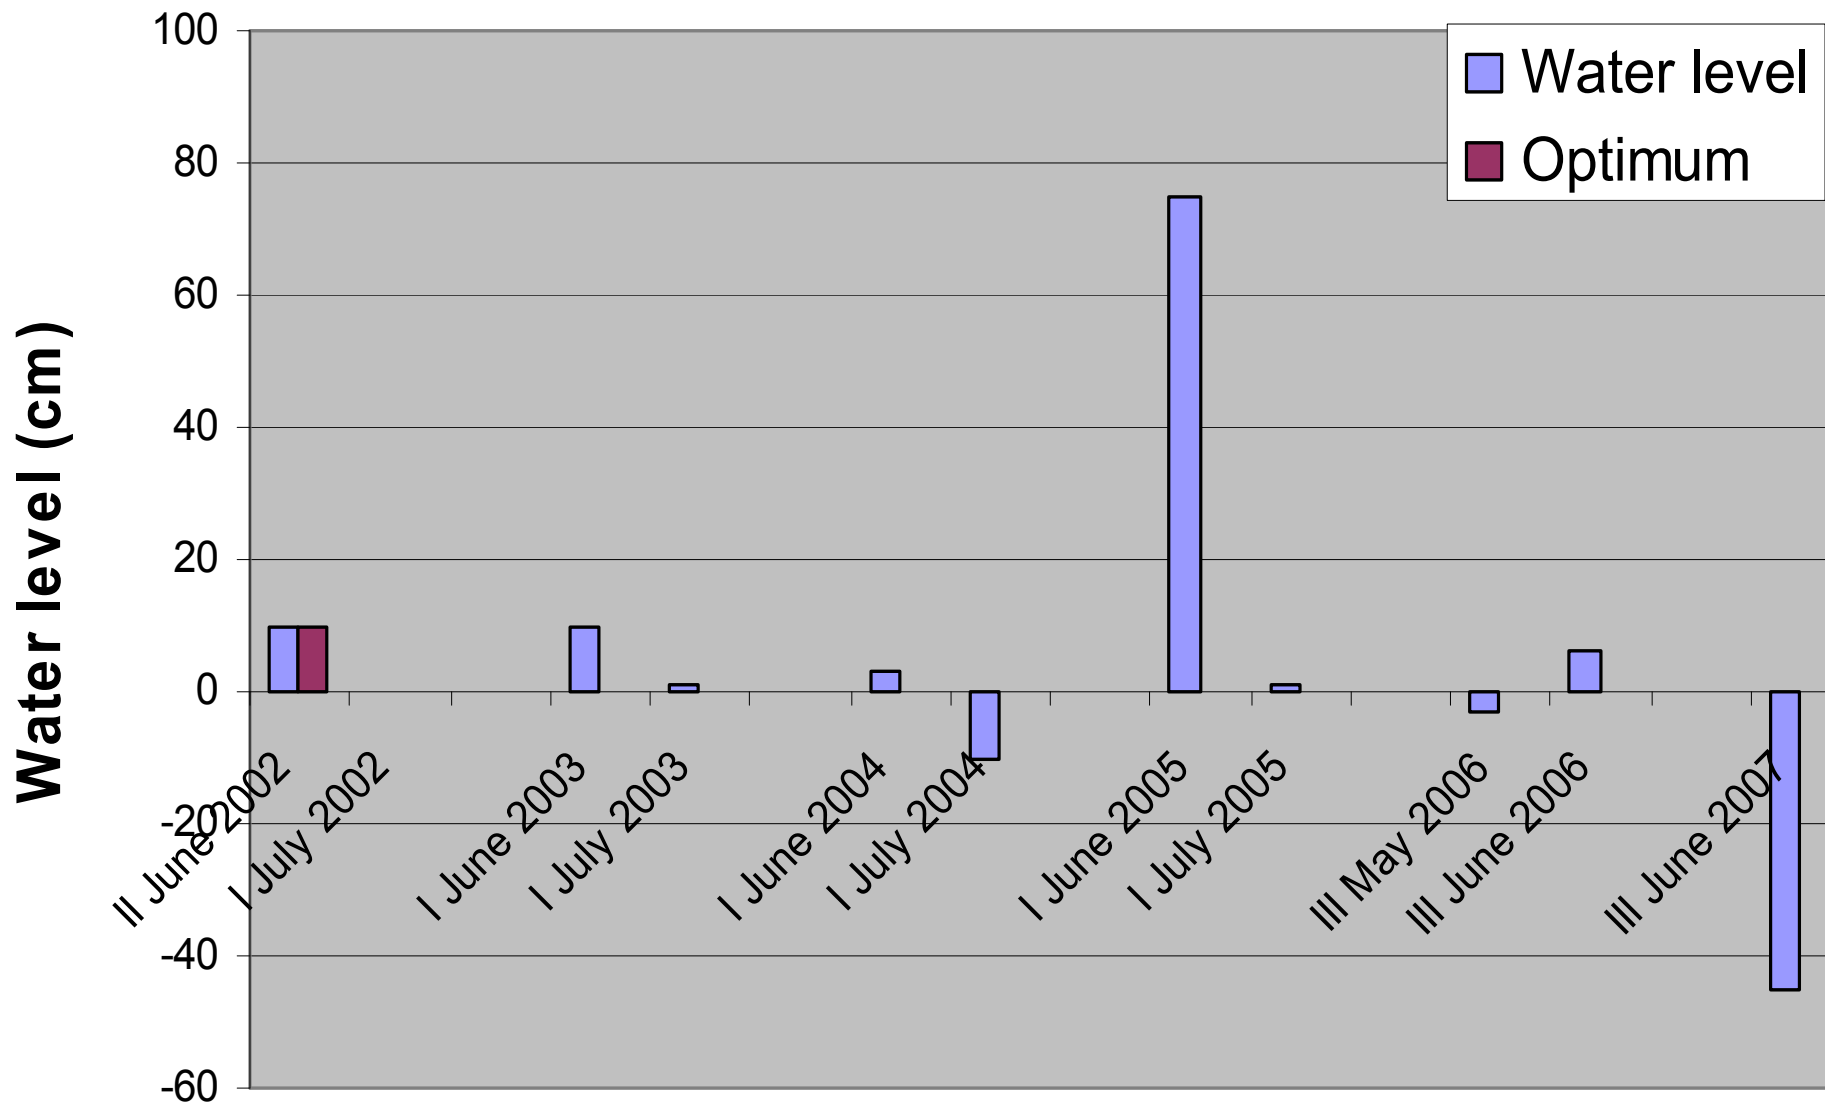

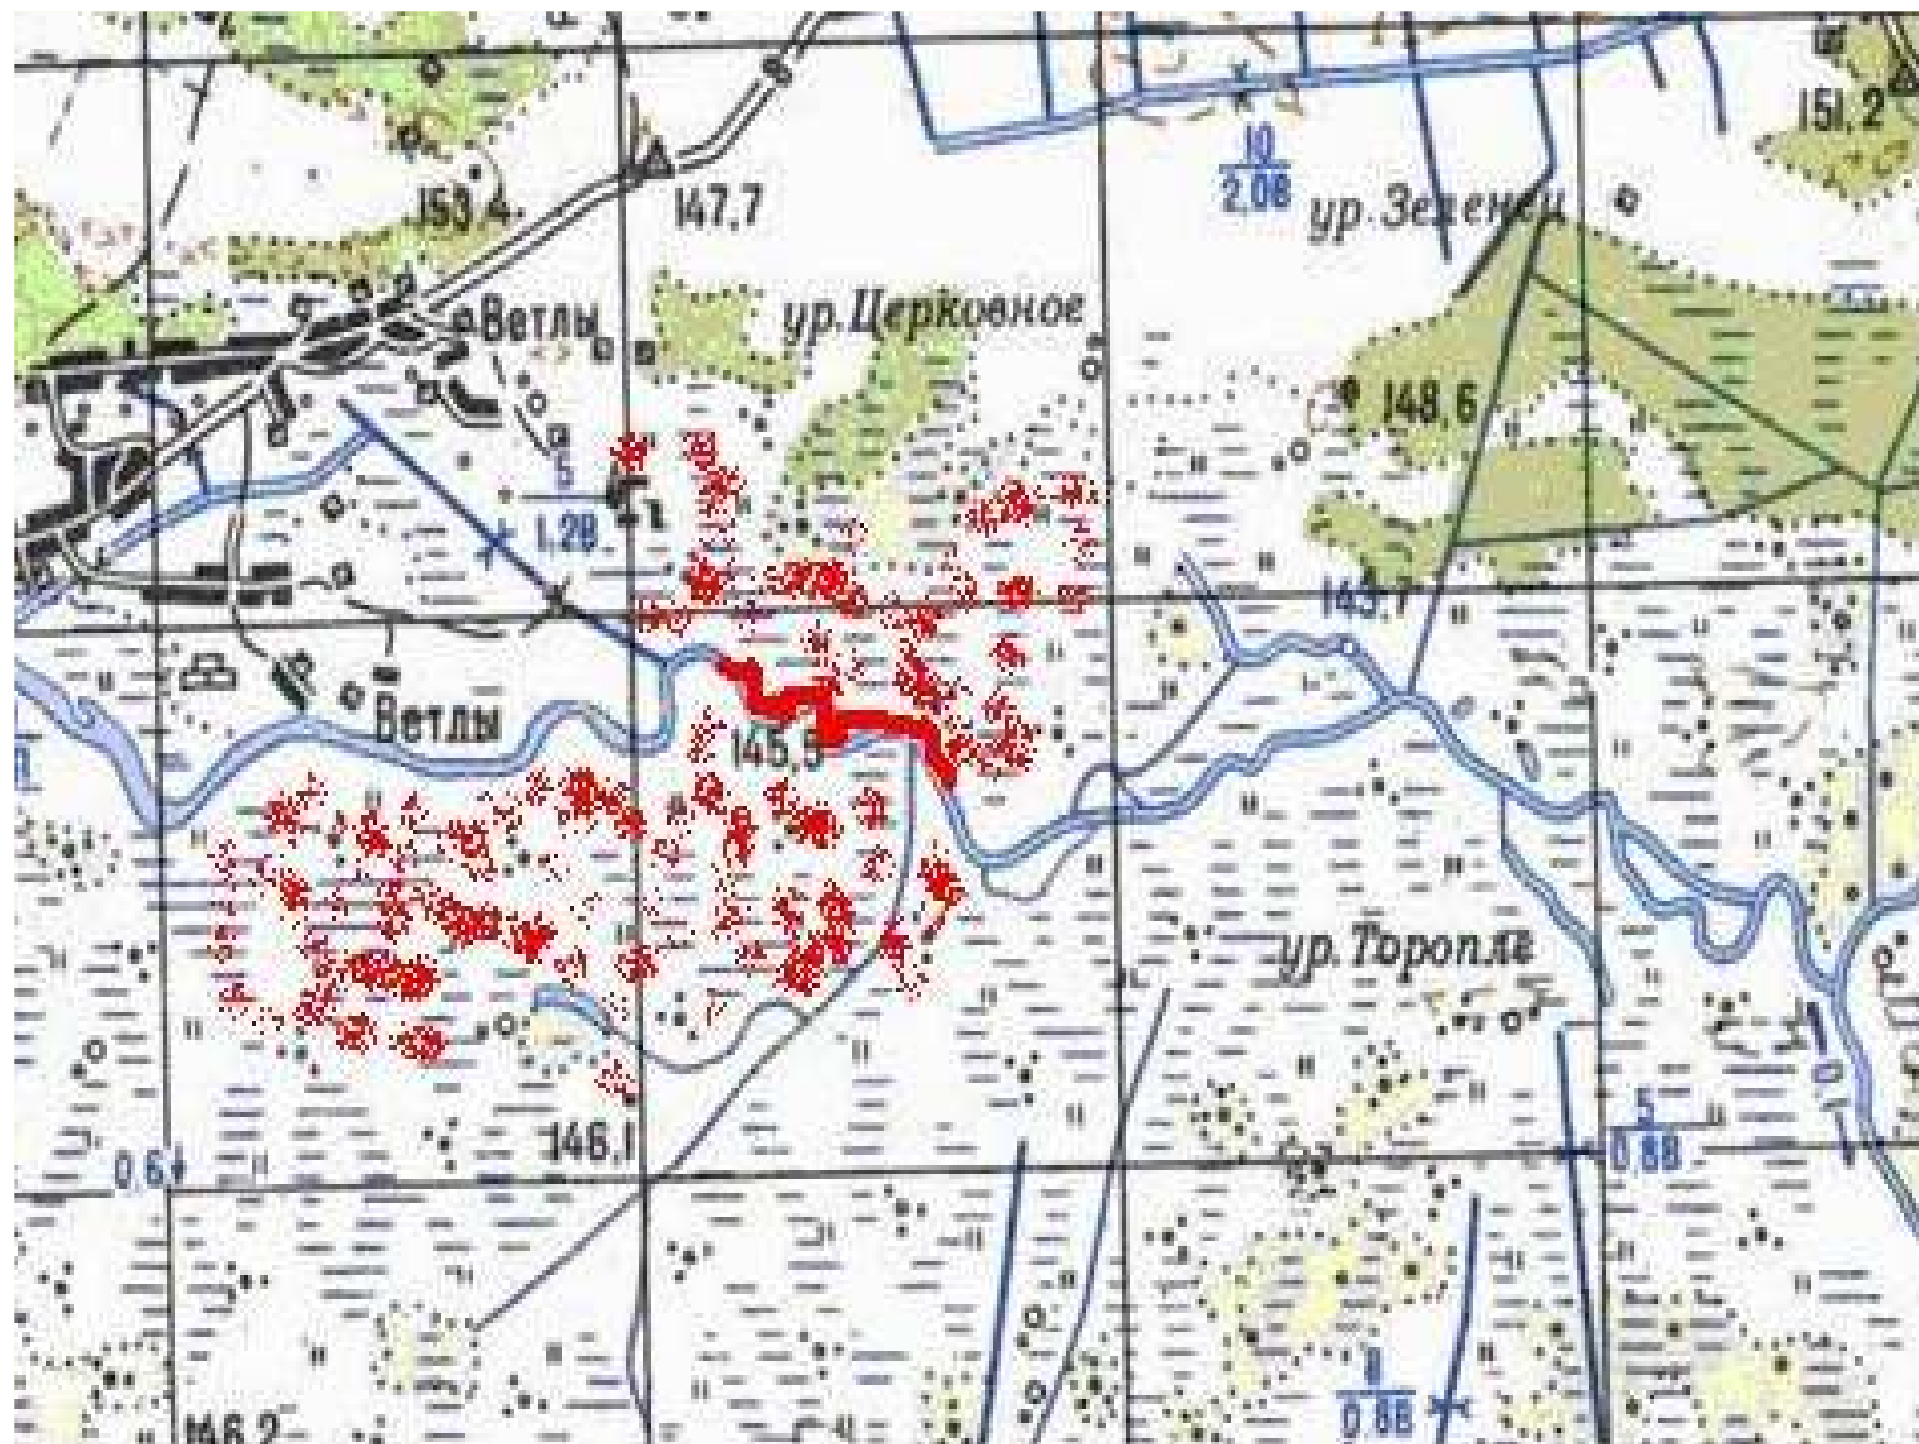

Значна частина гідрологічного заказника "Щедрогірський" осушена

Dynamic of water level at the monitoring plot "Pidgirya" in the Pripyat valley

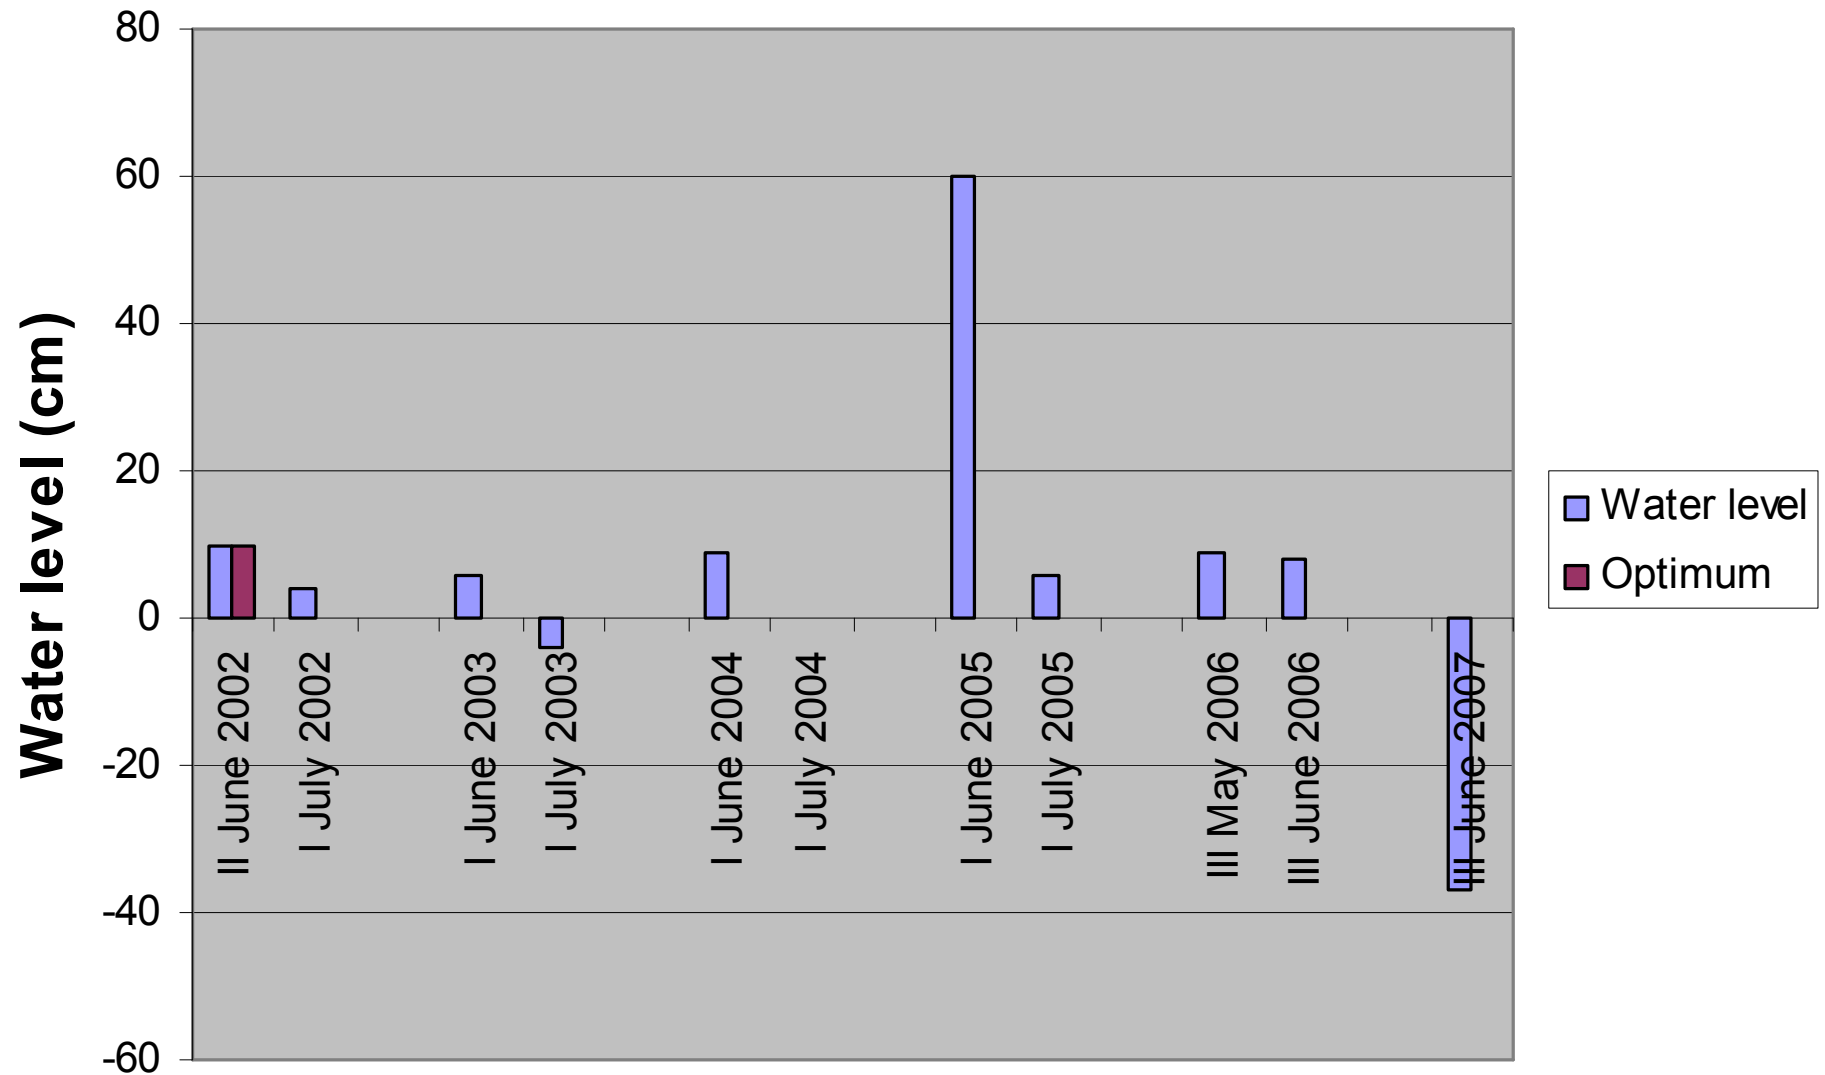

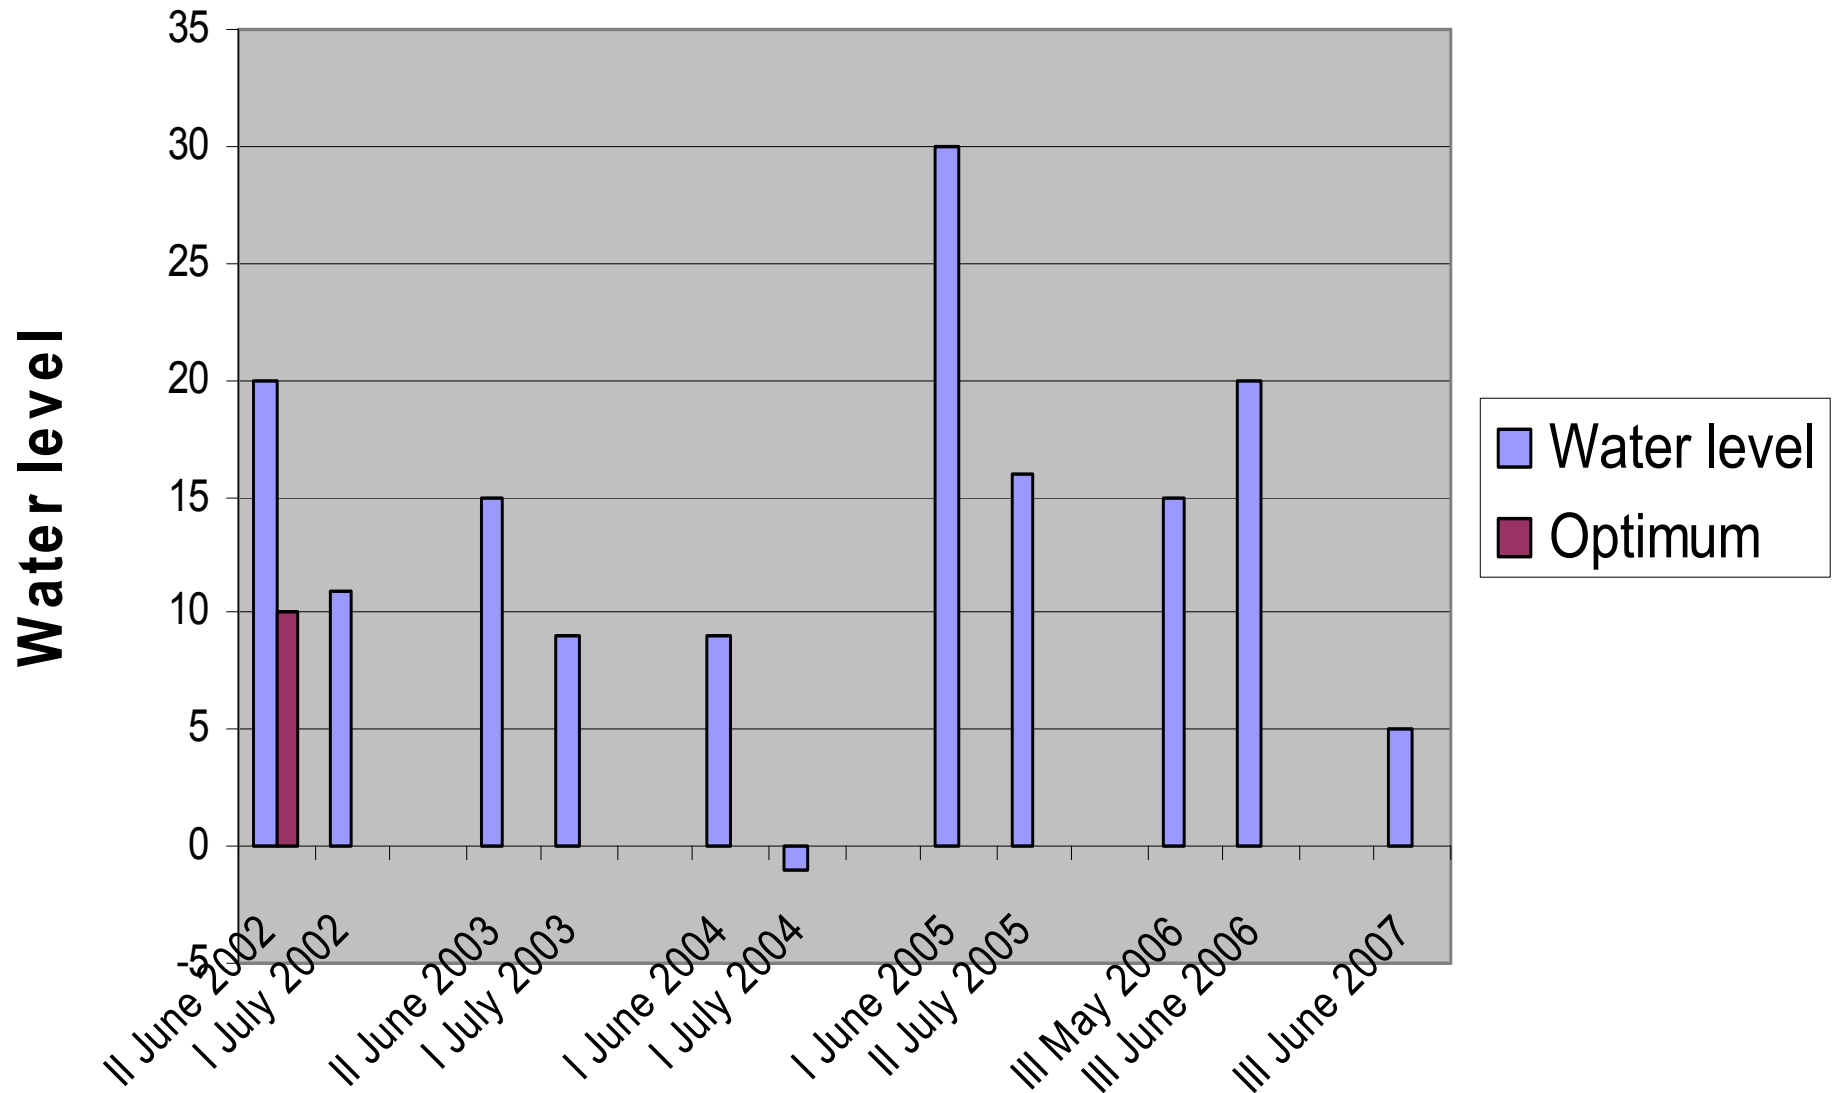

Dynamic of water level at the monitoring plot "Vetly" in the Pripyat valley

Dynamic of water level at the monitoring plot in the Vizhery mire

Thank you for attention
